

Soon after the deadline for submitting this assignment, you will be assigned other students' assignments to peer review. Read their assignments, think about their approaches and results, provide comments, and grade them according to the peer review grading scale you'll be given. This is an important part of the learning – there are so many reasonable approaches to most analytics questions that it's valuable to see other approaches besides yours and besides the sample solutions.

THIS IS A MANDATORY PART OF THE HOMEWORK ASSIGNMENT. IF YOU DO NOT COMPLETE YOUR PEER REVIEWS, YOU WILL RECEIVE A GRADE OF 0 (ZERO) ON THE ASSIGNMENT EVEN IF YOUR SUBMISSION IS EXCELLENT.
